Game Title: **Collect the Treats!**

In partial fulfillment of requirement of the course Advance Multimedia Systems (CTADMUSL)

Team name: TriadStudio

Team Members:

LANUZA, JUAN GABRIEL A.

BAUCA, JANSSEN AARON A.

SANTOS, TAYSHAUN PRINCE N.

Section: INF233

February 2026

Instructions of the Game

- **Controls**

The player will be able to control their character by using and coordinating their mouse and keyboard. In the keyboard part, the player can use their “W”, “A”, “S”, “D” keys to move their characters left, right forward and backward. Meanwhile, the player can use their mouse to move the POV (Point of View) of their character. Use the “Space bar” key to jump and hold “Shift” to sprint towards a direction.

- **Objectives**
  - The first objective of the game is for the player to talk to “Butch” which will be the main NPC of the game. Butch will be giving a main quest or objective for the player.

  - The second objective is after talking to Butch, the player must collect all the dog treats that Butch needed to get back to his original form.

- The third objective is after collecting all the dog treats in the particular stage, the player must find the National University Logo and touch it to go in the next stage. The Logo are usually at the top or the end of the trail of the parkour or obstacle path.

- The fourth objective the player must complete the objectives within the time limit. Each stage has different time limit, the first stage has a 3-minute timer, the second stage has a 5-minute timer, and the last stage has a 7-minute timer.

- The fifth objective is to collect the trophy that "Butch" will give at the end of the third stage which will be considered as the reward of the game.

- **Tips**

There are specific jumps in the obstacle course that players can easily skip, allowing them to speedrun and finish the game quickly.

In the second and third stages the player must be careful in jumping and going through the obstacle course because one big mistake can take them back to the first stage with the same time limit, making the player complete three whole stages in the given time limit depending on what stage you are currently in.

Be strategic on whether you need to use your “sprint” action to have a little boost when jumping through the obstacle course.

- **Troubleshooting**

The player can pause the game, which will also stop the timer. They can use this feature if they have a little errand or break that they need to do for them to not lose their progress or time.

In the main menu of the game, there is a “Help” button where the player can view the controls and instructions about the game which will guide them to finish and go through the stages smoothly.

There are areas in the environment where the player can be stuck, just spam the “Space bar” key to jump simultaneously in order to escape from that area.
